Dates

October 24-25, 2013

Location

[BESSY II / HZB](#)
Albert-Einstein-Str. 15
12489 Berlin
Germany

Scope

PTB offers a variety of measurement services in the VUV and EUV spectral ranges. The seminar is aimed at facilitating the exchange of ideas between partners from science and industry. The seminar topics include metrological developments and applications in the VUV and EUV spectral ranges in various fields such as optical industry, lithography, and astrophysics.
